Design and Implementation of a Novel Heterogeneous Picture Mailer.

N . Palaniappan

Abstract - Literature review revealed, the implementation of mail that is used to send the mail in the mailer that has encoded format. By using this encoding method the mail will be send very safe, the hackers cant read the mail. The mailer is used to send the encrypted mail directly to the mail box as it is. It can also send the effective html page, images and textual mails. Instead of this, the composer will send the mail with the enclosures (not as attachment) like . GIF / .PNG / .SWF / .JPG .
