Abstract - It has been observed from literature that e - Learning is becoming a major component in academia today. This paper discusses the key findings of an investigation e - learning systems -a framework for learning by doing and explaining with computer based Tutoring system. The e -learning softwares that is commercially available has been developed mainly to satisfy the needs of the industry, whose goal is the fast acquisition of competences. On the other hand, universities deal with learning process that develop themselves on a medium or a large term period, and their main idea is to help students to develop a cognitive representation of those sectors in which they are expected to operate.
