

International Journal on Recent Researches In Science, Engineering & Technology

A Journal Established in early 2000 and upgraded to International journal in 2013 and is in existence for the last 10 years. It is run by Retired Professors from NIT, Trichy. It is an absolutely free (No processing charge No publishing charge etc) Journal Indexed in DIIF and SJIF.

Research Paper

An Automatic Generation Technique of 3D vessels Model from Angiograms

Na Young Lee

Abstract - We present a method to automatically generate 3D vessels model from angiograms. The modeling method consists of two types , (1) automatically selecting two sets of corresponding feature points between general and individual vessels , and (2) warping with corresponding control points . The final algorithm is formulated as an energy minimization problem that we solve using dynamic programming optimization . Accurate descriptions of 3D vessels model would be useful for quantitative diagnosis of athrosclerosis , for surgical or treatment planning , for monitoring disease progress or remission , and for comparing efficacies of treatments .
