Brain Controlled Car For the Disabled Using Artificial Intelligence

Mohan kumaryadav, Md Irfan and Nishang Kumar Singh

Abstract - This paper investigates the development of a brain driven car, which would be of great help to the physically disabled people. Since these cars will rely only on what the individual is thinking they will hence not require any physical movement on the part of the individual. The car integrates signals from a variety of sensors like video, weather monitor, anti-collision etc. it also has an automatic navigation system in case of emergency. The car works on the asynchronous mechanism of artificial intelligence.
