

International Journal on Recent Researches In Science, Engineering & Technology

(Division of Civil Engineering)

A Journal Established in early 2000 as National journal and upgraded to International journal in 2013 and is in existence for the last 10 years. It is run by Retired Professors from NIT, Trichy.

It is an absolutely free (No processing charges, No publishing charges etc) Journal Indexed in JIR, DIIF and SJIF.

Research Paper

Available online at: www.jrrset.com

Chief Editor : Dr. M.Narayana Rao, Ph.D., Rtd. Professor, NIT, Trichy.

ISSN (Print) : 2347-6729

ISSN (Online) : 2348-3105

Volume 2, Issue 12,
December 2014

JIR IF : 2.54

DIIF IF : 1.46

SJIF IF: 1.329

Adaptive Deblocking of Images With DCT Compression

Dr. L. Ramasamy

Abstract - The Discrete Cosine Transform (DCT) is widely used in image and video coding schemes . By applying DCT to image blocks and quantizing the DCT coefficients, efficient image compression can be achieved . However, the quantization of the DCT coefficients introduces errors in the decompressed images, which appears as blocky art crafts . The blocky art crafts can be converted into "Gaussian Type" noise and removed via image denoising techniques. In this paper, an adaptive de blocking scheme has been removed to remove the blocky art crafts from images. Experimental results show that, with this adaptive approach , blocky art crafts have been successfully removed with improved Peak Signal -to -Noise Ratio (PSNR) values over the previous approach.
