An ontology based corporate knowledge

M . Kamarajan

Abstract - Literature reported that organization are increasingly recognizing the importance of managing what they consider their most valuable asset : Knowledge . This is contribution towards that end, proposing a system for representing , recording , using , retrieving , and managing individual and group knowledge : a group memory system . This paper describes the design and implementation of group memory system to manage heterogeneous and distributed knowledge embedded in business process activities . This paper also discusses the role that anthologies may play in corporate competence management .
