### Cervical Malignancy Preclusion Based On The Effectual Screening Stages

S. Athinarayanan and Dr.M.V.Srinath

**Abstract** - Cervical cancer is most common cancer. It will be happened into the women cervical cell of cervix area. The cervix is the lower part of the uterus. It is sometimes called the uterine cervix. The body of the uterus is where a baby grows. The cervix connects the body of the uterus to the vagina (birth canal). Cervical cancer is a preventable disease and it is affected by a women's cervical cell. Early diagnosis and treatment is successful in the majority of cases. This paper will be help to any women who would like to know what screening involves and how a diagnosis of cervical cancer is made.
