

International Journal on Recent Researches In Science, Engineering & Technology

(Division of Computer Science and Engineering)

A Journal Established in early 2000 as National journal and upgraded to International journal in 2013 and is in existence for the last 10 years. It is run by Retired Professors from NIT, Trichy. It is an absolutely free (No processing charges, No publishing charges etc) Journal Indexed in JIR, DIIF and SJIF.

Health condition observation using sensor network

Dr. S. Nagarajan

Abstract - Literature review revealed, main focus is on system architecture for smart healthcare using an advanced Wireless Sensor Network (WSN). It specifically targets assisted living residents and others who may benefit from continuous remote health monitoring. This research paper presents the advantages, objectives, and status of the design. An experimental living space has been constructed at the department of computer science for evaluation. Early results suggest a strong potential for WSNs to new perspectives for low - cost ad hoc deployment of multi model sensors for an improved quality of medical care.
