

International Journal on Recent Researches In Science, Engineering & Technology

(Division of Computer Science and Engineering)

A Journal Established in early 2000 as National journal and upgraded to International journal in 2013
and is in existence for the last 10 years. It is run by Retired Professors from NIT, Trichy.
It is an absolutely free (No processing charges, No publishing charges etc) Journal Indexed in
JIR, DIIF and SJIF.

Research Paper

Available online at: www.jrrset.com

ISSN (Print) : 2347-6729

ISSN (Online) : 2348-3105

Volume 4, Issue 6,
June 2016.

Implementation of a Web - based Real - Time Temperature Monitoring

Prof. Palanirajavel

Abstract - Literature describes the implementation of a wireless sensor network for the temperature monitoring of shellfish catches over the internet. Temperature loggers in shellfish boxes transmit data through radio frequency to a base station. The information is transferred to a server via the GSM network, where it is processed and uploaded to a database. The web – based interface allows configuration of the network and access to real - time and achieved temperature data through any internet - capable device. The system is designed to be completely autonomous, eliminating the need for repeated manual checks. Practical issues arising from implementation of the system are identified and performance of the system during field trials is assessed in comparison with commercially available temperature loggers.
